Cyber-Harassment Incident Report & Takedown Request

Report ID: AH-20261031-A8E1DCDB

Generated: 2026-10-31 03:33:58 UTC · 2026-10-31 09:03 Sri Lanka time

Prepared by the complainant with the AegisHer tool. This is not an official document of any authority; it is a structured record of the complaint and of the digital evidence, with cryptographic fingerprints that allow the recipient to verify the evidence has not been altered.

1. Summary

Incident type	AI-generated / manipulated image or video (deepfake)
First noticed	2026-10-28

Evidence files	1

2. Complainant

Full name	Nimali Perera (sample)
Email	nimali@example.com
Phone	+94 77 000 0000

3. Description of the incident

A fake explicit image made from my public Instagram photo was posted in a Telegram channel and shared on a Facebook page.

මගේ Instagram ඡායාරූපයක් AI මගින් වෙනස් කර, Telegram සහ Facebook හි පළ කර ඇත. ශ්‍රී ලංකා.

Suspected account(s) / person(s)	Facebook page "SL Hot Pics", Telegram channel @badchannel

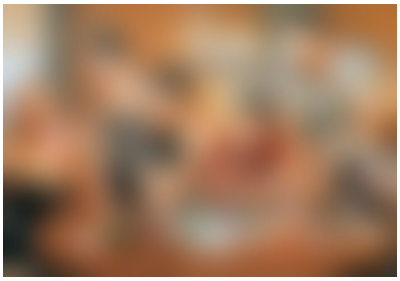

4. Offending content (URLs)

#	Platform	URL	Notes
1	Facebook	`https://www.facebook.com/slhotpics/posts/123456789`	Post with fake image
2	Telegram	`https://t.me/badchannel/42`	

5. Digital evidence register

Each file was fingerprinted on receipt, before any processing. SHA-256/SHA-512 identify the exact bytes; pHash/dHash are perceptual hashes that match visually identical copies even after resizing or re-compression. Thumbnails are blurred to avoid re-distributing harmful imagery.

6. Takedown and preservation request

I, Nimali Perera (sample), report that the content listed above was published or shared without my consent and causes me harm. I request that the receiving platform or authority:

- Remove / disable access to the listed content
- Preserve account and content records for law-enforcement requests
- Prevent re-upload of matching images (hash matching)

Please quote the Report ID in any correspondence. The perceptual hashes in Section 5 may be used to locate and block identical or near-identical copies.

7. Integrity and chain of custody

Manifest SHA-256	`38aa6a542404458e896984726a30545b` `61952fa1a5eae547f3f579590e09ae50`
Hashing tool	AegisHer 0.1.0 (Python hashlib, ImageHash)
Handling	Files were processed in memory only and were not stored by the AegisHer service. The complainant retains the original files.
How to verify	Compute SHA-256 of the original file (e.g. 'certutil -hashfile FILE SHA256' on Windows, 'sha256sum FILE' on Linux/macOS) and compare with Section 5.

8. Declaration

I declare that the information in this report is true and correct to the best of my knowledge.
